ICEMCRETE®

Manufacturers of Distinctive Decorative Coatings

A close-up photograph showing a thick, white, viscous liquid being poured from a white tube into a narrow trench. The trench is filled with brown, textured material, likely concrete or soil. The liquid is spreading and filling the trench, creating a smooth surface.

CEMKEY

Polymer-based bonding liquid

CemKey contains a resin with exceptional adhesive qualities. It is a reliable general-purpose adhesive for the building and decorative industry. It replaces the water addition component of cement based products and enhances the performance of these products.

BENEFITS

- Eliminates hacking
- Lime fast
- Compatible with cement, lime & sand
- Non-flammable
- Translucent when dry
- Adheres to concrete, brick, tiles cement, plaster & stone
