PRIMERCOTE

Tough adhesive for new screeds

Specially designed textured substrate coating used in combination with Cemcrete's FlexBond to bond new screeds to existing surfaces.

BENEFITS

- No dilution required, but needs to be mixed with FlexBond
- Will ensure screed adheres to substrate

SPECIFICATIONS

| | |
|-------------------|--|
| Suitable surfaces | Interior and exterior concrete surfaces |
| Thickness | Minimum thickness at application: 0.8 - 1 mm as a slush coat Maximum thickness at application: 5mm as filler mixed to a paste consistency |
| Application | Brush-on |
| Packaging | 5 & 20kg container |
| Coverage | Approximately 10 - 15m ² per 5kg container Approximately 40 - 60m ² per 20kg container Can vary depending on the porosity and texture of the surface |
| Curing | Initial set: 45 - 60 minutes depending on temperatures |
| Colour/s | Grey |
