

The logo for ICEMCRETE, featuring the word in a bold, red, sans-serif font with a black outline. The 'I' and 'C' are connected, and the 'E' has a unique shape. A registered trademark symbol (®) is at the end.

ICEMCRETE®

Manufacturers of Distinctive Decorative Coatings

A close-up photograph of several pieces of sculpted concrete. The pieces are in various shades of brown, tan, and grey, with some showing a rough, cracked texture. Two small, white, flame-like objects are placed on the surfaces of the concrete pieces, possibly to highlight their texture or as part of an artistic arrangement.

SCULPTCRETE

Fibre Cement Mixtures For Art Pieces

A scientifically formulated enhanced fibre-cement blend. Contains no hazardous materials and is suitable for interior or exterior use. Has superior workability and provides a smooth, weather resistant finish that can be carved when biscuit hard. Will allow very fine, detailed carving. Suitable for building up three dimensional details.

BENEFITS

- It will retain a shape even when very wet
- It will take extremely delicate carving and can be built up in layers
- Mosaics, pebbles etc can be laid into the surface
- It allows the artist plenty of time to carve because of its slow setting time

SPECIFICATIONS

Suitable surfaces	Used over wire or metal armature to create sculptures and large art pieces. Suitable for use as a base for mosaic, glass, etc.
Finish	Smooth or textured
Thickness	Applied in layers of 20mm at a time
Application	Pack-on, spray-on
Packaging	20kg bags
Coverage	20kg of SculptCrete will cover approximately 0.85m ² when applied 20mm thick
Curing	Cure all completed work by damping with clean water 3 times during the day on the following day It is a good idea to cover the article with plastic during this initial curing period Fast drying will cause surface cracking
